► THE UPWORK FREELANCER PAIN

Freelancers waste **hours** on jobs they'll never win

Manual job searching is inefficient, biased, and exhausting.

Most freelancers apply broadly and hope for the best.

🕒 Average freelancer spends **3-4 hours/day** manually browsing and filtering Upwork listings

Proposals sent without reading the job carefully result in **low win rates** and wasted connects

Generic cover letters fail to address client pain points — **most go unread**

18M+ registered freelancers competing on Upwork for the same jobs daily

~2% average proposal acceptance rate — most connects are wasted on poor-fit jobs

3-4h daily time lost to manual job searching, filtering, and writing proposals

0 tools that combine real-time scraping + AI scoring + personalized proposals in one platform

► ONE PLATFORM, FULL PIPELINE

From CV to winning proposal — automated

Upload Your CV

Claude AI reads your resume and extracts your niche, skills, rates, and experience level. Your profile drives everything.

→ AI-parsed in < 10 seconds

01

Scrape & Score

Bright Data's Unlocker API fetches fresh Upwork listings matching your niche. Claude scores each job across 10 dimensions.

→ 23+ real jobs per scrape

02

Generate Proposals

One click generates a personalized, tone-aware cover letter. Pick Professional, Friendly, or Bold. Track every application in a Kanban board.

→ 150-200 words, never generic

► POWERED BY BRIGHT DATA • WEB UNLOCKER

Bypassing Cloudflare to scrape live Upwork data

Upwork is heavily Cloudflare-protected and JavaScript-rendered. Standard scrapers are blocked instantly. Bright Data's **Web Unlocker** routes requests through residential IPs, returns fully rendered HTML — unlocking data that was previously impossible to access programmatically.

Web Unlocker API [zone1]

Bypasses Cloudflare bot detection via residential IP rotation. Returns 1.5MB+ fully rendered Upwork search pages with embedded job state.

__NUXT__ State Parser (Custom)

Decodes Upwork's IIFE-compressed __NUXT__ variable table to extract structured job data: title, skills, budget, dates, client info.

Parallel Fetch + Redis HTML Cache

3 concurrent Unlocker requests. 14-min cache TTL eliminates redundant API calls. Profile-driven keywords from user's CV guide which URLs are fetched.

◆ SCRAPE PIPELINE

- CV** Profile parsed → niche + top 3 skills extracted
- BD** Bright Data Unlocker API → Upwork search page
- HTML** 1.5MB rendered HTML received (bypasses Cloudflare)
- NUXT** __NUXT__ IIFE decoded → 10-40 job objects extracted
- DB** Jobs ingested → client analyzed → bid strategy computed
- AI** Claude scores each job → alerts dispatched

PERFORMANCE

23	~52s	14m
Jobs/scrape	Total scrape	Cache TTL

► FULL FEATURE SET

Everything a freelancer needs **in one place**

CORE

AI Job Scoring

10-dimension match analysis: skill relevance, budget fit, competition, client quality, win probability. Scored by Claude via AI/ML API.

BRIGHT DATA

Real-Time Scraping

Profile-driven keyword search. Bright Data Unlocker API fetches fresh Upwork listings every 15 minutes or on-demand.

AI/ML API

Cover Letter Generator

3 tones (Professional/Friendly/Bold), personalized to client pain points, never refuses to write regardless of skill match.

ANALYTICS

Bid Strategy Engine

8-step deterministic algorithm computes Competitive/Value/Premium bid price based on budget anchor, competition, and client quality.

UX

Proposal Tracker

Kanban board with 7 stages (Drafted → Won). CSV export, funnel analytics, pipeline value tracking. Apply+Track one click.

REAL-TIME

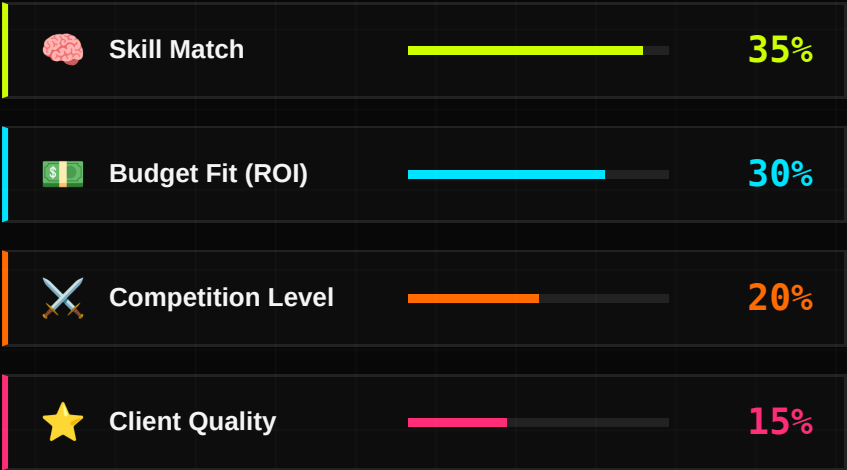

Smart Alerts

Score-threshold notifications via in-app bell, Slack, and email. SSE endpoint for instant scrape-complete job list refresh.

► CLAUDE-POWERED MATCH ANALYSIS

4 signals → one score

Each job is scored against the freelancer's profile using Claude AI for semantic analysis, then combined using a configurable weighted formula.

87

/ 100 MATCH

Skill Match		92
Budget Fit		85
Competition		88
Client Quality		78

◆ AI REASONING

"Strong Python/FastAPI alignment. Client has \$52K spend history with 82% hire rate — low risk. Only 4 proposals submitted — apply immediately."

RECOMMENDED BID
